Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Objections

Claims 4-15 and 21-29 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from another multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the agitation means of claims 19 and 20 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3, 16 and 17 are rejected under 35 U.S.C. 102(b) as being anticipated by Mott et al.

Mott discloses a method and apparatus for storing and transporting drilling waste. Figure 1 shows a platform 10 which can be for drilling or production. Moveable containers 14-16 are used for storing crude oil or drilling fluid waste when drilling. The containers are secured below sea level. The containers are connected to the platform through lines that deliver the material to be stored to the tanks. The material is conveyed through these lines to the storage containers 14-16. As to claim 2, col. 5, lines 10-17 state that the storage containers are transportable. The containers could be transferred to wherever needed, i.e. to a recycling or on-shore production facility. As to claim 3, at least two containers are provided. As to claim 16, the end of the tank is embedded in the ocean floor and this is the securing means for releasably securing the containers below sea level. As to claim 17, the tank itself is the anchor means to attach the containers to the ocean floor.

Claims 16-18 are rejected under 35 U.S.C. 102(e) as being anticipated by Blanchard et al.

Blanchard discloses moveable containers 20 secured below sea level. The containers are connected to the platform 13 through which the crude oil is delivered to the container. As to claims 17 and 18, base 30 is located on the ocean floor to receive the container. What is stored in the tanks is crude oil and not drilling waste. However, the containers are capable of containing drilling waste and in apparatus claims, the device only has to be capable of performing the function or use to anticipate the claim.

Allowable Subject Matter

Claims 19 and 20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
